

# Front-End Web Development Training

There are ten lectures and assignments you will complete as a part of this training. The course will give you a thorough introduction to HTML, CSS, and JavaScript.

Assignment #6 and Assignment #10 are significantly more work intensive than the others; this is known, noted, and intended. Assignment #6 is a group project which you will complete on your own (you may skip the design write-up), and Assignment #10 is the final project for the course which you will also complete on your own.
